# Registered Nutritionists, Dietitians, Associate Nutritionists and Nutritional Therapists

## A Comparative Summary

1. **Overview of Professional Roles**

<table>
<thead>
<tr>
<th>Registered Nutritionist (RNutr)</th>
<th>Dietitian (RD)</th>
<th>Registered Associate Nutritionist (ANutr)</th>
<th>Nutritional Therapist</th>
</tr>
</thead>
<tbody>
<tr>
<td>Registered Nutritionists provide scientific evidence-based information and guidance about the impacts of food and nutrition on the health and well-being of humans (at an individual or population level) or animals.¹</td>
<td>A dietitian uses the science of nutrition to devise eating plans for patients to treat medical conditions. They promote good health by helping to facilitate a positive change in food choice.²</td>
<td>Registered Associate Nutritionists (ANutr) have the knowledge and understanding of the five competency requirements for Registration and as graduates are working towards Registered Nutritionist (RNutr) status. This typically takes 3+ years once practical experience has been obtained.</td>
<td>The Complementary and Natural Healthcare Council (CNHC) describes nutritional therapists as ‘practitioners who use a wide range of tools to assess and identify potential nutritional imbalances and understand how these may contribute to an individual's symptoms and health concerns. This approach allows them to work with individuals to address nutritional balance and help support the body towards maintaining health.’³</td>
</tr>
<tr>
<td>Registered Nutritionists meet competency requirements for registration in one of five specialist areas: Nutrition Science, Public Health, Food, Sports &amp; Exercise and Animal Nutrition ¹</td>
<td>The title ‘dietitian’ is protected by statute. Only individuals registered with the Health and Care Professions Council (HCPC) may describe themselves as a dietitian.</td>
<td>The title 'nutritionist' is not protected by statute. ‘Registered Associate Nutritionists (ANutr)’ are governed by the Association for Nutrition (AfN) the voluntary regulator for registered Nutritionists (RNutr and ANutr).</td>
<td>The title ‘Nutritional Therapist’ is not protected by law.</td>
</tr>
<tr>
<td>The title ‘nutritionist’ is not protected by statute. ‘Registered Nutritionists (RNutr)’ are governed by the Association for Nutrition (AfN) the voluntary regulator for Registered Nutritionists.</td>

3. **Scope of Practice**

<table>
<thead>
<tr>
<th>Registered Nutritionist (RNutr)</th>
<th>Dietitian (RD)</th>
<th>Registered Associate Nutritionist (ANutr)</th>
<th>Nutritional Therapist</th>
</tr>
</thead>
<tbody>
<tr>
<td>Registered Nutritionists work across both human and animal nutrition at an individual and population level and their work is often international in scope. Registered Nutritionists work at a senior level in public health and nutrition science within the health service, academia and in the commercial sectors (food retail, service and manufacturing). Registered Nutritionists can provide nutrition advice directly to individuals and groups. Some Registered Nutritionists work in government or charities in health improvement and advocacy, in agricultural and animal feeds, in equine science, in the media and in elite sports and exercise. Occasionally Registered Nutritionists hold dual registration in another professional discipline, for example, Registered Nutritionists who work in clinical settings are also registered with the HCPC and/or with the General Medical Council.</td>
<td>Most graduates get their first job in a position such as a Band 5 Dietitian or Health Promotion Officer working within the National Health Service (NHS). The spectrum of environments in which dietitians practise includes the NHS, private practice, industry, education, research, sport, media, NGOs and national and local government.</td>
<td>Most Registered Associate Nutritionists work in public health and nutrition science within the health service, academia and in the commercial sectors (food retail, service and manufacturing). A Registered Associate Nutritionist will normally be supervised, working within a team and with relevant professional oversight and/or mentoring. A Registered Associate Nutritionist will not normally engage in wholly independent practice.</td>
<td>Nutritional therapists work mainly in a therapeutic setting with individual clients. Nutritional therapy is recognised as a complementary medicine. BANT and the CNHC describe nutritional therapists as ‘practitioners who use a wide range of tools to assess and identify potential nutritional imbalances and understand how these may contribute to an individual's symptoms and health concerns. This approach allows them to work with individuals to address nutritional balance and help support the body towards maintaining health.</td>

| AfN is a registered charity & the voluntary regulator for registered nutritionists. It holds the UK Voluntary Register of Nutritionists, *(UKVRN)*. Its purpose is to protect and benefit the public by defining and advancing standards of evidence-based practice across the field of nutrition and at all levels within the workforce.  
Registered Nutritionists use the post-nominal letters RNutr and provide evidence-based information and guidance in nutrition in one of five specialist areas: Nutrition Science, Public Health, Food, Sports & Exercise and Animal Nutrition. | HCPC is the statutory regulator for 16 health care professions, including dietitians. The HCPC maintains a register of dietitians who meet standards for training, professional skills, behaviour and health.  
The titles ‘dietitian’ and ‘dietician’ are both protected by statute, *(the Health Professions Order 2010)* and use the post-nominal letters RD. | AfN is a registered charity & the voluntary regulator for registered nutritionists. It holds the UK Voluntary Register of Nutritionists, *(UKVRN)*. Its purpose is to protect and benefit the public by defining and advancing standards of evidence-based practice across the field of nutrition and at all levels within the workforce.  
Registered Associate Nutritionists (generally recent graduates from AfN accredited undergraduate or postgraduate degree courses) use the post-nominal letters ANutr and demonstrate knowledge and understanding of the core competencies in nutrition. | The CNHC is a UK voluntary regulator for complementary therapists, set up with government support to protect the public. CNHC Register has been approved as an Accredited Voluntary Register by the PSA. Therapies registered include: Alexander Technique teaching, Aromatherapy, Bowen Therapy, Craniosacral Therapy, Hypnotherapy, Massage Therapy, Naturopathy, Nutritional Therapy, Reflexology, Reiki, Shiatsu, Sports Therapy, Yoga Therapy. |

### General Regulatory Council for Complementary Therapies (GRCCT)  
www.grcct.org

The GRCCT is a UK voluntary regulator for complementary and alternative medicine practitioners, set up by the Aromatherapy, Massage, Reflexology and Reiki therapies. This has since expanded to include a number of other therapies. Therapies registered include: Aromatherapy, Colon Hydrotherapy, Crystal Healing, Tapping, Hijama, Nutritional Therapy, Reflexology, Reiki, Shiatsu.
## 5. Professional Membership Body
